SEES TURNING POINT IN BANKING HISTORY
NEW YORK. — The American Bankers Association Journal in its July issue presents the following view of banking and business conditions: It is an almost universal opinion among bankers that June has been the turning point in banking history. This is based on the leading edge of the recovery. Reasons for the optimism are twofold: The confidence of the public in the banks and the prospects of a better banking business.

First Tea in England
Tea was not brought to England until the housewife was introduced into the English court by Catherine of Aragon. From the time of her arrival, tea has been a part of the English life. When the custom originated tea was drunk much weaker and in smaller cups than present day tea. In the second half of the eighteenth century, however, the tea became a more substantial drink.
